Calculations for Measures

MEASURE	DESCRIPTION AND HOW IT WAS CALCULATED
Graduation Rate	Figures calculated based on enrollment reports that follow the two intakes each academic year (September 2021 and January 2022). The retention rate is calculated by taking the total students at the end of each year of study and by dividing it by the number of returning students in the following two semesters (i.e. January 2022 for the September 2021 intake and September 2022 for the January 2022 intake).

<p>Job Placement Rate</p>	<p>Number of graduates based on oral defense and written reports following the successful completion of a 6-month Business Practicum in December 2021 and August 2022 compared to results from alumni survey in September/October 2022.</p> <p>Alumni survey results are based on 5 criteria in order for graduates to be counted as having been successfully placed: 1) Hired by company where student interned, 2) Employed in a different company, 3) Entrepreneur/freelancer, 4) Student pursuing further education* at ABSParis and 5) Student pursuing further education* at another educational institution.</p> <p><i>*Further education means pursuing a higher degree than the one completed at ABSParis.</i></p>
